

AZEEZ ADEWALE HAMZAT

Dublin, Ireland | azeezhamzat@yahoo.com | [LinkedIn](#) | [ORCID](#) | [Google Scholar](#) | azeezhamzat.com

RESEARCH INTERESTS

AI-facilitated collective decision-making; human-AI interaction in group settings; information diversity and collective accuracy; agricultural knowledge systems; participatory decision-making; agent-based modelling of social dynamics.

EDUCATION

PhD, AI-facilitated Collective Intelligence

2025 – Present

TU Dublin, SOHAM Centre (with Trinity College Dublin), Ireland

Doctoral fellowship investigating how AI systems affect group decision-making dynamics, information diversity, and collective accuracy.

MSc, Collective Intelligence

2020 – 2022

Mohammed VI Polytechnic University (UM6P), Morocco

Ibn Rochd Excellence Scholarship. Thesis: community knowledge-based assessment of smallholder farmers' perception of cluster farming in Nigeria.

BTech, Crop and Environmental Protection

2009 – 2014

Ladoke Akintola University of Technology (LAUTECH), Nigeria

Foundation in agricultural science, environmental systems, and field research methodology.

PUBLICATIONS

Hamzat, A.A. (2022). "A Community Knowledge-Based Assessment of Smallholder Farmers' Perception of Cluster Farming." *Zenodo Preprint*. DOI: [10.5281/zenodo.7678799](https://doi.org/10.5281/zenodo.7678799)

PROFESSIONAL EXPERIENCE

Outreach and Communications Officer

2023 – 2025

Africa Initiative, Mohammed VI Polytechnic University (UM6P), Morocco

- Designed and implemented outreach strategies connecting UM6P with educational institutions across Africa
- Facilitated brainstorming sessions, co-organized events, and co-facilitated cross-institutional meetings
- Created and maintained the department website and produced over 100 weekly newsletter editions
- Applied collective intelligence principles to organizational communication and stakeholder engagement

Packaging Supervisor

2017 – 2020

Olam International, Nigeria

- Supervised production line operations, managing staff and equipment across multiple shifts
- Coordinated quality control processes and resolved production bottlenecks under tight deadlines

RESEARCH EXPERIENCE

Master's Thesis Research

2021 – 2022

UM6P / Fieldwork in Nigeria

- Designed and conducted community knowledge-based assessment of smallholder farmer perceptions
- Collected qualitative and quantitative data from farming communities in southwestern Nigeria
- Connected agricultural extension methods with collective intelligence frameworks

Computational Research Projects

2020 – 2022

UM6P, Morocco

- Built agent-based model of misinformation evolution in social networks
- Conducted an exploratory corpus-based NLP analysis of 607 climate-technology articles (1995–2020), applying word embeddings, sentiment analysis, and factor analysis, benchmarked against the Paris Agreement and validated with global emissions data

TECHNICAL SKILLS

Programming & Data: Python, R, agent-based modelling, data analysis and visualization

Research Methods: Participatory research, fieldwork, survey design, qualitative analysis, community knowledge assessment

Communication: Academic writing, science communication, stakeholder engagement, web development

Languages: English (native), Yoruba (native), French (working proficiency), Arabic (basic)

AWARDS AND FELLOWSHIPS

Doctoral Fellowship

2025

TCD-TUD SOHAM Centre

Ibn Rochd Excellence Scholarship

2020

Mohammed VI Polytechnic University
